

AATi Rail

Project case study

2010

Audley End

Client: Network Rail

Contractor: WEC Group Ltd

Product: SN293/WL/280B

Material: Aluminium

Another AFA footbridge for the Bucket list!

Audley End Station (named after the Audley End Manor) serves the local villages of Saffron Walden and Wenders Ambo.

You can catch direct trains to Liverpool Street or Northbound to Cambridge or further afield to Birmingham New Street.

AATi supplied type SN293/WL/280B Cast Aluminium Anti-slip Stair Nosing for this new AFA Bridge, the nosings includes a special bevelled back edge detail towards the rear of the nosing. AATi worked in conjunction with WEC Group to ensure the project was delivered on time and to a high quality!
