

AATi Commercial

PROJECT CASE STUDY

FrogPubs

Customer: FrogPubs

FrogPubs have several establishments situated in France, they serve up mouth-watering burgers and American soul food but that's not it!

Since 1993 FrogPubs have served their own traditionally produced artisanal beers, all freshly brewed and drawn straight from the tank.

Frogbeer has its own production brewery located north of Paris with over 30 individual recipes, it's no wonder why they've received over 10+ awards for their carefully crafted beer.

AATi have supplied Cast Iron anti-slip stair nosings for various venues across France as follows; Frog at Bercy Village, Frog Bastille, The Frog & Princess, Frog Hop house and Frog Revolution.

Pictured right is AATi type- SN30/60 anti-slip stair nosing cast in Iron.

This nosing is a perfect choice to safely guide punters up and down the staircases with high slip resistance properties and also exceptional durability.
