

AATi Rail

Project case study

Pre 1990 & 2011

Paddington Station

Client: Network Rail

Contractor: CMF Ltd and Morgan Sindall

Product: Padding roof Scroll

Material: SG Iron

AATi worked closely with CMF Ltd and Morgan Sindall to re-make the damaged original Cast Iron scrolls by Brunel within the historic spans of Grade 1 listed Paddington Stations roof. This was a £20 million project from Network Rail to refurbish roof spans one to three at Paddington Station.

AATi is part of the FSE Group (www.fsegroup.co.uk)- supplying Cast Metal Products for the engineering and construction sectors. See also FSE Foundry website (www.fsefoundry.co.uk) for further information regarding our cast metal products and services.
