## PROJECT CASE STUDY

May 2012

### Tuttons, Covent Gaarden

**Customer: Orientrose Contracts Ltd**

**Architect: Russell Sage Studio**

Tuttons is arguably one of the most famous and long standing restaurants in Covent Garden, situated on the east side of the historic piazza, overlooking the hustle and bustle of the markets - a perfect place to sit, eat, drink and watch the world go by.

AATi have all exits covered to this extremely busy venue, due to Tuttons frequent visitors, they required stair nosings that were durable and that could withstand the constant footfall.

The stair nosings are exposed to the elements and AATi knew that their SN9/55 Nickel Bronze stair nosings would be sufficient for this application.

The AATi Nickel Bronze nosings will age elegantly to match the brass fixtures and fittings throughout the restaurant, therefore ensuring that the aesthetics are in keeping with Tuttons unique style as it enjoys its long and healthy establishment.

- AATi SN9/55 cast Nickel Bronze anti-slip stair nosing.
