

AATi Commercial

PROJECT CASE STUDY

April 2014

Wahaca Restaurant

Customer: French Group

Architect: Softroom Limited

Located south of the River Thames on London's Waterloo Road, you will find this ever popular Mexican restaurant.

You can take a short stroll from any of the Waterloo stations or alternatively for a slightly longer walk, you can travel from Southwark Underground Station.

AATi manufactured type SN30/60 nosings in Cast Iron with a phosphate treatment. AATi have supplied several Wahaca venues across London and hopefully many more as they continue to expand.

Pictured below AATi SN30/60 cast Iron anti-slip stair nosing phosphate black.
